WHY STUDY AT CQUNIVERSITY

State-of-the-art facilities

CQUniversity has invested more than AU$200 million in the past five years in state-of-the-art infrastructure to provide an optimal learning environment and specialised teaching spaces to support your studies.

Internships

We are committed to ensuring our graduates are work ready by equipping them with real-world skills and up to date industry knowledge. To strengthen that commitment, we have introduced internships for many postgraduate courses for international students.

Social Innovation

By studying at a university that is heavily focused on social innovation, you will learn in a supportive environment where talent for social change and making a difference is nurtured and developed. You will also gain invaluable interdisciplinary, entrepreneurial and problem-solving skills that will prepare you for success in a dynamic and changing world.

Student Support

As a student at CQUniversity, there is an extensive range of free support services available to help you reach your academic goals, enjoy your time at university and assist you to grow professionally and personally.

» Campus Life Committee
» Academic Learning Centre
» Library Services
» Welfare and Advocacy Support
» Multi-faith and Disability Services
» Student Experience
» Student Representative Council
» CQUni Careers (Career Connection)

Research

CQUniversity engages with regional, national, and international research communities and industry partners to increase research activity and offer outstanding research qualifications for students. CQUniversity is conducting research rated at, above and well above world standards in many areas including Mathematics, Psychology, Nursing, Agriculture and VET Science, Environmental Science, Engineering, Medical and Health Science, Artificial Intelligence, and Public Health and Health Services.

The Australia Awards Scholarships (AAS) are prestigious international scholarships funded by the Australian Government to offer the next generation of global leaders an opportunity to undertake study, research and professional development in Australia. The scholarships aim to develop skills and knowledge of individuals to drive change and contribute to the development outcomes of their country.

\[\text{DUANGMANY VONGMACHANH, LAOS} \]
\[\text{MASTER OF MARKETING} \]

‘The Australia Awards Scholarship has given me the opportunity to promote not only myself but my country and culture to others. I enjoyed participating in class with lecturers who are very helpful and gave me knowledge which I can take back to my country.’

\[\text{KISHOR DAHAL, NEPAL} \]
\[\text{PHD-SCIENCES, ENGINEERING AND HEALTH} \]

‘I am grateful to Australia Awards, CQU, my wonderful mentor and the industry for providing me with many opportunities to learn. Upon graduation, I would like to practice what I’ve learnt, and return to my position at a teaching and research institution in Nepal.’

» Master of Project Management
» Master of Sustainable Tourism

NEW COURSES AVAILABLE NOW

MASTER OF PUBLIC HEALTH

Duration: 2 years full-time
Availability: Melbourne

This course takes a different approach to most MPH degrees in that it focuses specifically on providing you with the skills and knowledge to be able to work effectively in community-based and community-led public health. Community-based public health works from a 'bottom-up' approach, building partnerships with communities and agencies that work within communities. It values respecting the contributions of all members of the community and partners, promotes shared decision-making and autonomy, builds on the strengths and assets that are already available, and promotes change through the production of knowledge and skills that benefits the whole community. As a graduate you will be able to apply public health methods to a community-based/partnership approach. This is highly sought after by organisations who are working in international development, community development, health promotion, disaster recovery, rural and remote areas, and those working with First Nations Peoples.

MASTER OF PROJECT MANAGEMENT

Duration: 2 years full-time
Availability: Brisbane, Melbourne, Perth, Sydney

This course is specifically designed for current and potential project managers in industry. It equips you with advanced project management principles and techniques which can be applied across a range of industries. Students develop the knowledge, skills and conceptual understanding needed to apply project management principles to project work and address resource management, risk management, business analysis and strategy. This course focuses on both the hard technical and soft human aspects of project management as used in large commercial and public organisations. You will undertake a research project that can be based on either your workplace or issues that are important to the general project management profession. This coupled with an internship will further prepare you to contribute to future growth and change in the projects you are involved in. The course provides an opportunity for you to extend your knowledge through coursework and research into project arrangement. The conclusion of the course is a research project that can be based on either your workplace or issues that are important to the general project management profession. All of the unit materials are aligned to the Project Management Institute (PMI) global standards and core bodies of knowledge.
APPLY

For application information specific to your country, visit www.australiaawards.gov.au.

» Find the CQUniversity course that interests you and meets the priority area for your country.
