1 PURPOSE

- 1.1 All employees, students, contractors and volunteers have specific responsibilities for safety and health that aligns with the [Australian Work Health and Safety Strategy 2012–2022](#) and the CQUniversity [Occupational Health and Safety Policy](#) whilst conducting activities within or on behalf of the University.
- 1.2 This procedure sets out a systematic process to clearly define roles and responsibilities of all levels of University management.

2 SCOPE

- 2.1 This procedure applies to employees, students, contractors and visitors who participate in CQUniversity business operations and activities.
- 2.2 This procedure does not apply to University-owned corporate entities.

3 PROCEDURE

General work health and safety duties and responsibilities

- 3.1 Duties for work health and safety are legislated in the [Work Health and Safety Act 2011](#) (Qld) (the Act). The Act details the duties of a 'person conducting a business or undertaking' (PCBU), officers and workers, as well as suppliers and manufacturers.
- 3.2 This procedure references the Act as enforced in Queensland. Subsequent to the 2011 harmonisation of Work Health and Safety legislation across the majority of Australian states, compliance with this procedure allows relevant duty holders to meet their obligations at locations in other states and territories.

However, when ambiguity exists between the Act and local state Work Health and Safety Legislation, the requirements of the local legislation will take precedence.

3.3 The following principles apply to all duties in Part 2 of the Act:

- a duty is not transferable
- a person may have more than one duty
- more than one person can have the same duty
- management of risks to ensure they are eliminated or minimised, so far as is reasonably practicable.

CQUniversity

3.4 In accordance with the Act, as a PCBU, the University has a primary duty of care to ensure workers and others are not exposed to a risk to their health and safety.

3.5 A primary duty of care is owed by the University when it:

- directs or influences work carried out by a worker
- engages or causes to engage a worker to carry out work
- has management or control of a workplace.

3.6 The University must meet its obligations, so far as is reasonably practicable, to provide a safe and healthy workplace for workers or other persons by ensuring:

- safe systems of work
- a safe work environment
- provision and safe use of plant, structures and substances
- facilities for the welfare of workers are adequate
- notification and recording of workplace incidents
- adequate information, training, instruction and supervision is provided
- provision of any information and or instruction to ensure staff work in a safe manner
- effective systems are in place for monitoring the health of workers and workplace conditions.

3.7 The University must also have meaningful and open consultation about work, health and safety with its workers, health and safety representatives and health and safety committees. The University must consult, cooperate and coordinate with other PCBUs with whom they share duties. The University will also have further obligations if involved in specific kinds of activities such as:

- the management and control of workplaces, or fixtures, fittings or plant at workplaces
- the design, manufacture, import or supply of plant, substances or structures
- installation, construction or commissioning of plant or structures.

Officers, senior officers and directors

3.8 The Act outlines the duties of officers of a PCBU. Officers are defined in the Act as a person who makes decisions, or participates in making decisions that affect the whole or a substantial part of a business or undertaking, and has the capacity to significantly affect the financial standing of the business or undertaking. If a person is responsible only for implementing those decisions, they are not considered an officer.

From 1 July 2018, senior officers are also defined with the Act as the holder of an executive position (however described) in relation to the person who makes, or takes part in making, decisions affecting all, or a substantial part, of a person's functions. This term is used when establishing offences under "industrial manslaughter". A senior officer meets their obligations by exercising due diligence in the same way as officers.

- 3.9 It is an officer's duty to exercise due diligence to ensure their business or undertaking fulfils its health and safety obligations under the Act. The essential elements of due diligence for an officer are interrelated and cumulative in nature.
- 3.10 These elements require an officer:
- to acquire and keep up to date knowledge of work health and safety matters
 - to gain an understanding of the operations of the business and the hazards and risks involved
 - to ensure appropriate resources and processes are provided to enable hazards to be identified and risks to be eliminated or minimised
 - to confirm information regarding incidents, hazards and risks is received and the information is responded to in a timely way
 - to ensure the PCBU has, and implements, processes for complying with any legal duty or obligation
 - to make certain processes are verified, monitored and reviewed.

Workers, students and visitors

- 3.11 The term 'worker' for the purposes of this procedure includes any person who works for the University such as:
- employee
 - trainee
 - volunteer
 - apprentice
 - work experience student
 - contractor and their employees
 - labour hire company employees assigned to work for the University.
- 3.12 Workers, students and visitors will take the following actions while at the University:
- take reasonable care for their own health and safety
 - take reasonable care for the health and safety of others
 - comply with any reasonable instruction from the University
 - cooperate with and follow any University policies and procedures.

Specific work health and safety responsibilities

- 3.13 Specific responsibilities for work health and safety (WHS) roles within the University have been documented in [Appendix 1](#) of this procedure. Further detail on WHS responsibilities shall be outlined in position descriptions, policies, guidelines, procedures and other WHS management system documentation where appropriate.

Work health and safety authority and accountability

- 3.14 All workers, students and visitors of the University have the authority to report hazards in the workplace and exercise their responsibilities under the Act to improve work health and safety. The authority to make decisions in the workplace to eliminate or reduce the risk from workplace hazards varies according to the organisational structure as per [Appendix 1](#) of this procedure.
- 3.15 WHS accountability refers to the measurement of whether managers, supervisors, employees and others in the workplace are meeting their allocated work health and safety responsibilities. Mechanisms which are utilised at the University to verify the implementation of assigned WHS responsibilities include:
- Hazard and incident reports

- WHS verification audits
- CQUniversity Risk Register
- WHS meeting attendance and participation
- WHS inspection reports.

4 RESPONSIBILITIES

Compliance, monitoring and review

- 4.1 The National OHS Manager is responsible for monitoring, reviewing and ensuring compliance with this procedure.
- 4.2 Responsibilities are outlined in [Appendix 1](#) of this procedure.

Reporting

- 4.3 Reporting requirements are outlined in [Appendix 1](#) of this procedure.

Records management

- 4.4 Staff must maintain all records relevant to administering this procedure in a recognised University recordkeeping system.

5 DEFINITIONS

- 5.1 Terms not defined in this document may be in the University [glossary](#).
